Finely decorated and skeletonised movement

Classy, mechanical, special, and elegant – the ARTEM collections presents very appealing design, eye-catching at a second glance. The entire case is made up of smoothly rounded geometry, with a double bevel on the bezel which is resembled by the bandfix lugs. Whether you go for a self-winding or a manual caliber, or you choose a chronograph – each ARTEM may pride itself on being one of the very slimmest-in-class, with its slimness being further enhanced by its sleek contour. As is usual with Jean Marcel, choose from a range of highly sought-after masterpieces of Swiss watchmaking art. These vintage, rare self-winding and hand-wound calibers shine in staggering beauty and most elaborate polishings, logically calling for a number of skeletonized dial designs. The ARTEM collection is completed by an exquisite selection of high-grade straps and bracelets.
