One of the slimmest automatic watches worldwide - only 7.4mm height

Mystery effect – invisible JM emblem on the crystal becomes visible when breathed on

The Stealth models, available in automatic or manual winding versions, are among the thinnest watches in the world in their respective categories and are characterised by their minimalistic design. The case is made of solid 316L stainless steel, finished with a high-quality Swiss DLC coating, which ensures both durability and an elegant look. With a diameter of 41 mm, sapphire crystal on both sides and water resistance up to 5 bar, the watch combines sporty versatility with timeless elegance. A modified ETA 2892A2 calibre in the highest configuration "Chronomètre" ensures the utmost precision and, depending on the model, is certified as a chronometer by the COSC. The name says it all: if desired, the watch disappears almost invisibly under the cuff of the shirt, making it the perfect companion for any occasion.
