 sapphire crystal

Mystery Effect – invisible JM emblem on the crystal becomes visible when breathed on

DETAILS

Wristband
 all stainless steel Milanese mesh bracelet with JM butterfly folding buckle

One of the slimmest mechanical watches - only 6mm height

limited edition 100 pieces

With its collection "TANTUM", Jean Marcel presents eight noble mechanical wristwatches in an extremely flat stainless steel case. Named after the Latin word for "only", it features two automatic chronographs with an overall height of only 11 mm, four three-hand automatic watches with date – and an extremely slim 8 mm total height – and, as a special highlight, two hand-wound models that are only 6 mm high. Due to the minimized overall height of the watch design, the timepieces in the new TANTUM collection can therefore be regarded as the flattest models in their respective market segments.
