curved K9 aluminum silicate crystal – pressure resistance about 9 times higher than normal mineral crystal

Mystery Effect – invisible JM emblem on the crystal becomes visible when breathed on

DETAILS

Wristband
very fine Vintage calf leather strap, undersurface made of very soft Nappa leather, outstandingly comfortable

limited edition 300 pieces

Chronometer providing less than 10 seconds deviation per year

each watch comes with its individual Chronometer certificate, issued by the Swiss testing institute C.O.S.C.

Swiss Made chronometer with exceptional accuracy: The new COSC-tested ACCURACY in its current size with 41 mm diameter and six dial variants. The "Officially Certified Chronometer" in apricot designation points out the high-precision Swiss watch technology: Only movements with a maximum rate deviation less than a second per month will be assembled into the ACCURACY stainless steel case. The curved aluminium silicate glass produced in Germany offers outstanding optical quality and has an extremely high compressive stress on the surface of up to 900 megapascal, which is 9 times higher than for a normal mineral glass. As with numerous other Jean Marcel models, the Mystery-effect shows as if by magic and reveals the JM brand logo. In a secretive way, this points out the authenticity of this watch that is limited to 300 pieces. The Accuracy collection will be available from July 2019 on.
