

S P L E N D O R

Ref. 382.60.65.63

MOVEMENT

Caliber
JM A29 (ETA 2824-2)

Origin
Swiss Made

Jewels
25

Frequency
28,800 A/h

Power reserve
42 hours

Type
Automatic

Functions
hours, minutes, seconds

Skeleton movement with high level finishing with Glucydur balance, blued screws and premium polishing

CASE

Material
stainless steel 316L

Diameter
42.0 mm

Height
11.00 mm

Bandfix width
22 mm

Water-resistant
30 ATM

Crystal
anti-reflective sapphire crystal

Caseback
sapphire crystal

screw-down crown with JM emblem

unidirectional rotating 120-clicks bezel with PVD plating and luminous dot

Mystery Effect – invisible JM emblem on the crystal becomes visible when breathed on

DETAILS

Wristband
water resistant rubber strap including stainless steel buckle

limited edition 300 pieces

Transparent smoked glass dial

Sporty-elegant, dynamic, and precise - the cases of the SPLENDOR collection captivate with their unusual shapes and multiple surfaces. Shiny polished, satined and sandblasted as well as PVD-coated elements create tension and yet complement together harmoniously. Our three-hand models [of the automatic watches] have a unidirectional rotating bezel. Here, Jean Marcel's quality standards are immediately perceptible as the rotating ring is clearly defined and precisely clicks into place in one of 120 positions. The Clou de Paris decorated chronograph based on the ETA Valjoux 7761 caliber has a fixed bezel. With this rare Swiss movement, the date is not displayed in a window -as is usually the case- but by a fourth central hand and can be easily read thanks to the large, highly contrasted numbers on the bezel. The chronograph is operated via the black PVD-coated pushers, which are seamlessly integrated into the case body. The SPLENDOR SEVEN DAYS models display the date at the 9 o'clock position which enables a particularly large display of the weekday at the 3 o'clock position.
