rubber strap with stainless steel pin buckle and logo engraving

Hybrid ceramic indices, cast from pure luminous material

68h power reserve

ceramic bezel

Mystery effect – invisible JM emblem on the crystal becomes visible when breathed on

limited edition 200 pieces

*Case made of ultra-light, hardened titanium, water-resistant to 500m /1640ft, with helium valve and ceramic bezel. This collection is ready for any adventure. A technical and visual highlight are the hybrid ceramic indices made of pure luminous material, manufactured as cast parts, as well as the hands with Super-LumiNova Grade X1. The result: an exceptionally powerful luminous effect that offers absolute clarity even at great depths or at night. The Maris Ti500 comes with a solid titanium bracelet or a high-quality FKM rubber strap. Both versions impress with their durability and excellent wearing comfort. Developed to meet the highest demands both underwater and on land, the Maris Ti500 collection combines state-of-the-art materials, precise Swiss movements and the characteristic design craftsmanship of Jean Marcel.*
